

Dear Dave,

11/15/93

When we spoke yesterday the reason I asked you if the released LBJ transcripts include those Gerry got at my suggestion is because there is no indication that they are included from the Post's story.

I was even more surprised that those transcripts were processed for disclosure in 1966-7 and withheld for that long.

How well this fits in NEVER AGAIN! to which I'd like to add it in full. I hope you'll write me on their telling you they did not have those transcripts only recently so I can include that also. *And what else is omitted from them.*

The early a.m. CBS radio news this morning reports a conference on the JFK assassination at Harvard, with Marina there. Be interested if you see anything on that and may perhaps write a letter to the right person there. Who can they have had as panelists? Posner? Specter? Idebeler? Nuts?

This at HARVARD?

I've written to ask the Post for copies of those transcripts through the appointment of the Commission.

I think that by and large Lardner and Pincus did a fine job of recounting those early days. I do not recall that ever having been done before. The third may be a bit trickier but the first two are informative articles and may well be the best of the anniversary pieces and shows.

I think you'll recognize some of them!

I hope the Post routeman who is to save these for me has enough for Gerry and Bill. I've asked for more than two if he has them left over.

PLS may rival CBS for the prize of the stinkers. I hope I get transcripts of both.

Best,

*Leid*
